CMCV/IMRC Lockout/Delete Plate Kit for 11-17 Mustang GT 5.0L
using 2018+ Intake Manifold

Kit Contents:

- LH Delete Plate (Driver Side)
- RH Delete Plate (Passenger Side)
- Washer (x6)

Step 1: Place JR3Z-9424-A 2018+ manifold assembly on a work bench. You will need to remove the CMCV/IMRC hardware and connections from the back of the assembly.

Step 2: You will need a set of snap ring pliers to remove the IMRC's from the manifold assembly.

Step 3: Remove the factory retaining torx screws from the back of the assembly and the solenoid on top of the manifold. You will reuse the rear six screws (Three per side)

Step 4: Remove the CMCV/IMRC assemblies from the manifold (Use appropriate install kit for 11-14 or 15-17 vehicles for vacuum and purge valve if power package purchased)

Step 5: Place the CMCV/IMRC delete plates on each of the factory connecting points pictured below. Reuse the factory rear coarse threaded screws and included washers to secure the IMRC delete plates on the back of the manifold.
